

SAN FRANCISCO NEUROLOGICAL SOCIETY

ADVANCING KNOWLEDGE & IMPROVING PRACTICE IN THE NEUROSCIENCES FOR OVER 70 YEARS.

2018 PARKINSON'S DISEASE SYMPOSIUM NOVEMBER 3, 2018

**JW Marriott Union Square
515 Mason St, San Francisco, CA 94102**

Program Description:

Parkinson's disease is a progressive neuro-degenerative disorder that affects up to 1 million Americans. It is the second most common neuro-degenerative disorder after Alzheimer's disease. Currently effective symptomatic treatment options exist but are not consistently practiced leading to variability in care for this patient population. The understanding and treatment of Parkinson's disease is ever expanding affording our patients more opportunities and options for a better quality of life. SFNS will hold its third biennial Parkinson's disease Symposium in November 2018. Our last PD symposium was highly successful, attracting clinicians of all fields who participate in the care of patients with Parkinson's disease. Topics presented will include Psychiatric Issues in PD, Dysarthria and Communication in PD, Biomarkers in PD, Spine Surgery in PD, Advancements in DBS Surgery and Young Onset Parkinson's Disease.
